

ABSTRACT ANT PLAYGROUND

Imagine you are as small as an ant. What would you like to climb on, slide on, bounce on, or crawl through if you were that size? Build your dream playground out of paper.

You'll need: This pattern (printed on colored paper), scissors, glue.

1. Cut out this instruction rectangle. It will be the base of your playground. Then cut the paper strips. (If you are making the project with a group, have your students trade with the other students to get different colors.)
2. Bend, fold, and curl the strips of paper into imaginative shapes to make playground equipment for ant-sized people.
3. Flip this instruction rectangle over and glue the paper strips to it.
4. Look at your playground from all different angles. Does it look fun and interesting?
