

# SPACE BALL

You'll need: Crayons, scissors, paper punch, string

1. Color the circle - front and back. Cut it out.
2. Fold the circle in half and in half again on the dotted lines.
3. Cut out each arc, starting where the line is touching the dotted line. Cut the arc almost to the other dotted line, but don't cut through it.
4. Carefully unfold the circle and press it flat with your hands. The arcs you cut should look like a rainbow and an upside down rainbow.
5. Start with the upside down rainbow. Fold the upper half of the center circle forward. Fold every other arc forward.
6. Flip the circle over. Repeat step 5 on the other half of the circle.
7. Punch a hole in the top. Tie a string through the hold. Hang your space ball from a high place.
